Outstanding design which makes the enclosure the most suitable for urban areas.

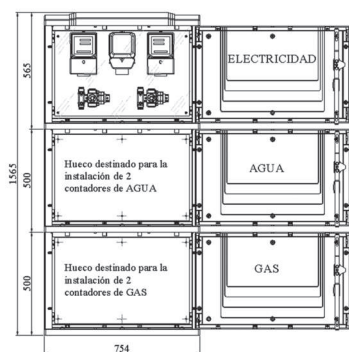

SOLID & STRONG
The advanced design and thickness gives the enclosure a maximum strength against impacts and vandalism while avoiding any deformations and bows.
The special pattern on the door and the back gives the enclosure and outstanding aesthetical design which also provides a reinforced structure to the whole enclosure.

safybox ART

Polyester Enclosures

General Features

- Hot moulded fibreglass reinforced polyester enclosures, inalterable due to exposure to an outdoor environment light grey colour RAL-7035, according to norm EN-62208.
- Self-extinguishing material, 960° glow fire test according to norm EN-20672
- Non hygroscopic material, water absorption is minimum.
- Easy to machine to customize the enclosure.
- Extreme weather conditions range -50° +120°
- Most suitable material on harsh environments such as heavy chemicals, outdoors and UV resistant.
- Natural ventilation to avoid internal condensations .
- Wall mounting or floor standing on a pedestal or a concrete base. Indoors or outdoors applications.
- IP43 or IP55 depending on your requirements. IK10 impact resistance

MODULARITY
The enclosures can be connected together to assemble LV switchgear and controlgear pillars.

Comprehensive range of pedestals available for all our Safybox-ART cabinets.

SAFYBOX ART IP-43/55, IK10

Outstanding Design.

Our Safybox-ART range of enclosures is the most suitable for all urban areas. Advanced design to provide the enclosure with maximum strength against impacts and vandalism while keeping a superb aesthetical look.
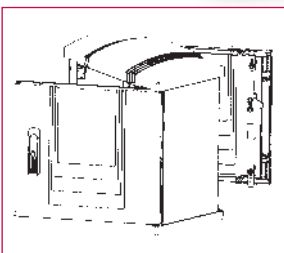

Suitable for electrical, water, gas and telecom applications.

Under the same aesthetic line, it can be combined together with Safybox-APM and Safybox-GL range of enclosures

LOCKING FEATURES

Three point locking system with a swing handle. Simple and unbreakable. We use flat-profile aluminium bars to provide them with maximum strength and make sure that the enclosure locks always properly.

• 2 doors as an option if required

• PNA-140 - Range of reinforced screws to fix the enclosure on a concrete base

• Safybox-ART enclosures are available in flat pack to reduce the volume in about a 70%

• SDP-300-ART. Range of threaded screws with nuts to adjust the mounting plate at the required depth

• Range of transparent polycarbonate plates to protect the user from all live parts of the assembly

Outdoor enclosures with roof. IP43
