WELCOME TO SICAME AUSTRALIA PTY LTD

THE NEW GENERATION OF OVERHEAD AND UNDERGROUND SEALED INSULATION PIERCING CONNECTORS AND FITTINGS

Sicame Australia Pty Ltd has established a strong reputation as the leading manufacturer and supplier of Low Voltage Aerial Bundled Cable (LVABC) Insulation Piercing Connectors and associated equipment in Australia.

In response to the growing trend toward the adoption of Overhead Aluminium XLPE Service Cable by numerous supply authorities, Sicame Australia has developed a complete range of products specifically designed for the purpose. This system allows a safe, economic and speedy installation of a customer to overhead mains with provision for cable connection, support and fusing at both the house end and pole end.

These products have been tested to the relevant Australian Standards for connectors and hardware as well as European and American Standards. IPC products have been tested in compliance with AS4396 (Int.) 1996 for IPC's.

This catalogue will guide you through the range of overhead and underground connectors and other products that are currently approved and utilised by your local electricity utility.

We commend these products to you and your customers.

Robert Battle
Managing Director
