Stainless Steel Electrical Enclosure with Thermal Control  
Provided by IP Enclosures

# World Class Electrical Enclosures

## Introduction

IP Enclosures is a leading, high-quality Australian brand of electrical enclosures. We provide wall-mounted electrical enclosures and floor-standing electrical cabinets up to IP66 for low-voltage switchgear and controlgear assemblies. The full range can be provided in powder coated galvanised steel, aluminium or grade 316 stainless steel. Our enclosures conform to IEC62208 and IEC/EN/AS60529 with protection up to IP66.

A wide range of IP66 19" data racks and accessories are available to house sensitive data network equipment in harsh environments. A range of roadside and infrastructure field cabinets are available and we also provide custom electrical enclosures to suit specific project requirements.

Accessories including rain hoods, inner doors, locking solutions, LED lights and various mounting solutions are available to suit all sizes. High quality thermal management products including ventilation fans and filters, heaters, air conditioners and controllers can be provided separately or as an assembly.

Our electrical enclosures and accessories are manufactured to the highest standards using world-class international manufacturing facilities in Europe. We have provided thousands of electrical enclosures throughout Australia and have exported throughout Europe, UK, USA, UAE, New Zealand and Asia Pacific regions.

IP Enclosures are available throughout Australia via a network of distributors and wholesalers. We look forward to working with you to meet your electrical enclosure needs.

**“IP Enclosures is an internationally registered trademark. Aim for high quality and specify IP Enclosures.”**

# Mounted Electrical Enclosures

## Steel | Powder Coated

# S1

**SINGLE DOOR | IP66**

The IP Enclosures S1 range of powder coated galvanised steel single door enclosures are designed to house a variety of electrical switch and control equipment. They are suitable for internal and external electrical installations for industrial, infrastructure, commercial and communications applications. All IP Enclosures are built to precision to ensure consistent high quality standards.

## Features & Specifications

**IP Enclosures S1 range of steel electrical enclosures are suitable for general industrial applications.**

**Protection:** Complies with IP66 IK10, NEMA 4  
(Independent accredited test laboratory)

**Standard:** IEC62208, IEC/EN/AS60529  
(IEC/EN/AS61439 Compliant, Optional UL508A) 

**Material:**

- Body: 1.2mm galvanised steel sheet (up to 700x500x250)  
1.5mm galvanised steel sheet (800x600x200 and above)
- Gland Plate: 1.5mm galvanised steel sheet
- Door: 1.5mm galvanised steel sheet
- Device Mounting Plate: 1.5mm galvanised steel sheet
- Seal: Polyurethane. UL listed.

**Body:** The robust monoblock body is fabricated using galvanised steel sheet (1.2mm-1.5mm). Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nutserts are incorporated to accommodate mounts and accessory fasteners to eliminate drilling and retain IP rating. Integral device plate mounts and M6 earth studs are provided. A galvanised steel gland plate is incorporated into the bottom face. Cutting, pressing and full continuous seam welding using precision automated manufacturing equipment ensures accuracy and consistent high quality.

**Single Door:** The robust surface mounted door is fabricated using 1.5mm galvanised steel sheet and incorporates concealed removable hinges with captive pins. The door is designed for a 110° opening. Each door contains cable management rails, an M6 earth stud and a high quality machine-applied foamed in place (FIP) Polyurethane seal. Two internal cable management rails can be removed to provide additional space for equipment, duct and door mounted control components.

**Seal:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Lock:** Chrome 3mm double bit insert quarter turn lock with key. A full range of locking options are available upon request.

**Device Mounting Plate:** The device mounting plate is fabricated using 1.5mm galvanised steel sheet, pressed to provide additional strength and supplied pre-fitted into the enclosure as standard.

**Gland Plate:** Gland plates incorporate a seal and are provided with fasteners. The size and quantity vary according to enclosure size. The gland plates are incorporated into the bottom face of the enclosure body, located towards the rear adjacent to the device plate for ease of cable management.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish 80-120 micron average thickness. Standard colour: RAL7035 (Other colours available upon request).

S2

Steel | Powder Coated

DOUBLE DOOR | IP55

The IP Enclosures S2 range of powder coated galvanised steel double door enclosures are designed to house a variety of electrical switch and control equipment. They are suitable for internal and external electrical installations for industrial, infrastructure, commercial and communications applications. All IP Enclosures are built to precision to ensure consistent high quality standards.

## Features & Specifications

**IP Enclosures S2 range of steel electrical enclosures are suitable for general industrial applications.**

**Protection:** Complies with IP55 IK10, NEMA 4  
(Independent accredited test laboratory)

**Standard:** IEC62208, IEC/EN/AS60529  
(IEC/EN/AS61439 Compliant, Optional UL508A) **CE**

**Material:**

- Body: 1.5mm galvanised steel sheet
- Gland Plate: 1.5mm galvanised steel sheet
- Door: 1.5mm galvanised steel sheet
- Device Mounting Plate: 1.5mm galvanised steel sheet
- Seal: Polyurethane. UL listed.

**Body:** The robust monoblock body is fabricated using 1.5mm galvanised steel sheet. Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nuts are incorporated to accommodate mounts and accessory fasteners to eliminate drilling and retain IP rating. Integral device plate mounts and M6 earth studs are provided. Gland plates are incorporated into the bottom face. Cutting, pressing and full continuous seam welding using precision automated manufacturing equipment ensures accuracy and consistent high quality.

**Double Doors:** The robust surface mounted doors are fabricated using 1.5mm galvanised steel sheet and incorporates concealed removable hinges with captive pins. The doors are designed to eliminate the central mullion to improve accessibility into the enclosure. The doors are designed for a 110° opening. Each door contains integral cable management rails, an M6 earth stud and a high quality machine-applied foamed in place (FIP) Polyurethane seal. Internal cable management rails can be removed to provide additional space for equipment, duct and door mounted control components.

**Seal:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Lock:** 3 point locking system with key-lock swing handle. A full range of locking solutions are available upon request.

**Device Mounting Plate:** The device mounting plate is fabricated using 1.5mm galvanised steel sheet, pressed to provide additional strength and supplied pre-fitted into enclosure as standard.

**Gland Plates:** Gland plates incorporate seals and are provided with fasteners. The size and quantity vary according to enclosure size. The gland plates are incorporated into the bottom face of the enclosure body, located towards the rear adjacent to the device plate for ease of cable management.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish 80-120 micron average thickness. Standard colour: RAL7035 (Other colours available upon request).

# Mounted Electrical Enclosures

**SS1**

Stainless Steel Grade 316/316L (Optional 304)

**SINGLE DOOR | IP66**

The IP Enclosures SS1 range of stainless steel single door enclosures are designed to house a variety of electrical switch and control equipment in extreme environments. They are suitable for internal and external electrical installations for industrial, infrastructure, commercial, communications, defence, marine, food and beverage applications. All IP Enclosures are built to precision to ensure consistent high quality standards.

## Features & Specifications

**IP Enclosures SS1 range of stainless steel electrical enclosures are suitable for general industrial applications.**

**Protection:** Complies with IP66 IK10, NEMA 4x  
(Independent accredited test laboratory)

**Standard:** IEC62208, IEC/EN/AS60529  
(IEC/EN/AS61439 Compliant, Optional UL508A) **CE**

**Material:**

- Body: 1.5mm Grade 316/316L Stainless Steel (Optional 304)
- Door: 1.5mm Grade 316/316L Stainless Steel (Optional 304)
- Device Mounting Plate: 1.5mm Galvanised Steel Sheet
- Seal: Polyurethane. UL listed.

**Surface Finish:** 0.4 micron Ra surface brushed finish

**Body:** The robust monoblock body is fabricated using 1.5mm Grade 316/316L Stainless Steel (Grade 304 is also available). Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nutserts are incorporated to accommodate mounts and accessory fasteners to eliminate drilling and retain IP rating. Integral device plate mounts and M6 earth studs are provided. Cutting, pressing and full continuous seam welding using precision automated manufacturing equipment ensures accuracy and consistent high quality.

**Single Door:** The robust surface mounted door is fabricated using 1.5mm Grade 316/316L Stainless Steel and incorporates concealed removable hinges with captive pins (Grade 304 is also available). The door is designed for a 110° opening. Each door contains cable management rails, an M6 earth stud and a high quality machine-applied foamed in place (FIP) Polyurethane seal. Two internal cable management rails can be removed to provide additional space for equipment, duct and door mounted control components.

**Seal:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Lock:** Grade 304 Stainless Steel 8mm square drive quarter turn lock with key. (316 Stainless Steel optional). A full range of locking solutions are available upon request.

**Device Mounting Plate:** The device mounting plate is fabricated using 1.5mm galvanised steel sheet, pressed to provide additional strength and supplied pre-fitted into the enclosure as standard.

### Incorporates many advanced features as standard

- Fabricated using grade 316 stainless steel (Optional 304)
- Incorporates flat sealing face to improve seal life
- Includes door cable rails
- Includes nutserts for mounting brackets and accessories to retain IP rating
- Includes mounting points for accessories including inner door escutcheons, rain hoods etc.

# Mounted Electrical Enclosures

**SS2**

Stainless Steel Grade 316/316L (Optional 304)

**DOUBLE DOOR | IP55**

The IP Enclosures SS2 range of stainless steel double door enclosures are designed to house a variety of electrical switch and control equipment in extreme environments. They are suitable for internal and external electrical installations for industrial, infrastructure, commercial, communications, defence, marine, food and beverage applications. All IP Enclosures are built to precision to ensure consistent high quality standards.

## Features & Specifications

**IP Enclosures SS2 range of grade stainless steel electrical enclosures are suitable for general industrial applications.**

**Protection:** Complies with IP55 IK10, NEMA 4x  
(Independent accredited test laboratory)

**Standard:** IEC62208, IEC/EN/AS60529  
(IEC/EN/AS61439 Compliant, Optional UL508A) **CE**

**Material:**

- Body: 1.5mm Grade 316/316L Stainless Steel (Optional 304)
- Door: 1.5mm Grade 316/316L Stainless Steel (Optional 304)
- Device Mounting Plate: 1.5mm Galvanised Steel Sheet
- Seal: Polyurethane. UL listed.

**Surface Finish:** 0.4 micron Ra surface brushed finish

**Body:** The robust monoblock body is fabricated using 1.5mm Grade 316/316L Stainless Steel (Grade 304 is also available). Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nutserts are incorporated to accommodate mounts and accessory fasteners to eliminate drilling and retain IP rating. Integral device plate mounts and M6 earth studs are provided. Cutting, pressing and full continuous seam welding using precision automated manufacturing equipment ensures accuracy and consistent high quality.

**Double Doors:** The robust surface mounted doors are fabricated using 1.5mm Grade 316/316L Stainless Steel and incorporates concealed removable hinges with captive pins (Grade 304 is also available). The doors are designed to eliminate the central mullion to improve accessibility into the enclosure. The doors are designed for a 110° opening. Each door contains cable management rails, an M6 earth stud and a high quality machine-applied foamed in place (FIP) Polyurethane seal. Internal cable management rails can be removed to provide additional space for equipment, duct and door mounted control components.

**Seal:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Lock:** 3 point locking system with key-lock swing handle. A full range of locking solutions are available upon request.

**Device Mounting Plate:** The device mounting plate is fabricated using 1.5mm galvanised steel sheet, pressed to provide additional strength and supplied pre-fitted into the enclosure as standard.

### Incorporates many advanced features as standard

- Fabricated using grade 316 stainless steel (Optional 304)
- Incorporates flat sealing face to improve seal life
- Includes door cable rails
- Includes nutserts for mounting brackets and accessories to retain IP rating
- Includes mounting points for accessories including inner door escutcheons, rain hoods etc.

# Mounted Electrical Enclosures

Steel | Powder Coated

**SSR1**

**SLOPING ROOF | SINGLE DOOR | IP66**

The IP Enclosures SSR1 range of powder coated galvanised steel sloping roof enclosures are designed to house a variety of electrical switch and control equipment. The sloping roof assists to prevent build up of dust, debris and waste material.

## Features & Specifications

IP Enclosures SSR1 range of steel sloping roof electrical enclosures are designed to house a variety of electrical switch and control equipment while preventing build up of dust, debris and waste material.

**Protection:** Complies with IP66 IK10, NEMA 4

**Standard:** IEC62208, IEC/EN/AS60529 

**Material:**

- Body: 1.2 Galvanised Steel Sheet (Heavy Duty Option: 2mm)
- Door: 1.2 Galvanised Steel Sheet (Heavy Duty Option: 2mm)
- Device Mounting Plate: 1.5mm Galvanised Steel Sheet
- Seal: Polyurethane. UL listed.

**Body:** The robust monoblock body with sloping roof is fabricated using 1.2mm galvanised steel sheet (2mm for Heavy Duty Option). Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nutserts are incorporated to accommodate mounting. The roof consists of a sloped roof design that protrudes past the seal, flush with the door face. (Heavy Duty Option protrudes past pushbuttons).

**Single Door:** The robust surface mounted door is fabricated using 1.2mm galvanised steel sheet (2mm for optional Heavy Duty) and incorporates concealed removable hinges with captive pins. The door is designed for a 110° opening. Each door contains cable management rails, an M6 earth stud and a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Seal:** UL listed Polyurethane seal (FIP). Temperature resistance: -40°C to 80°C

**Lock:** Chrome 3mm double bit insert quarter turn lock with key.

**Device Mounting Plate:** 1.5mm galvanised steel sheet.

**Surface Treatment:** Powder coated 80-120 micron average thickness textured finish (Heavy Duty Option is provided with a smooth finish).

# Mounted Electrical Enclosures

# SSR1-SUN

Steel | Powder Coated | Sun Shields

SLOPING ROOF | SINGLE DOOR | IP66 | with Sun Shields Fitted

The IP Enclosures SSR-SUN range of powder coated galvanised steel sloping roof enclosures with sun shields are designed to assist in controlling internal temperatures of enclosures installed in extreme environments exposed to direct sunlight. The sloping roof assists to prevent build up of dust, debris and waste material.

## Features & Specifications

IP Enclosures SSR1-SUN range of steel sloping roof electrical enclosures with sun shields are designed to house a variety of electrical switch and control equipment while preventing build up of dust, debris and waste material. Sun shields (solar shields) are fitted to external surfaces to assist in controlling the internal temperature of the electrical enclosure when exposed to extreme heat from sunlight.

**Protection:** Complies with IP66 IK10, NEMA 4

**Standard:** IEC62208, IEC/EN/AS60529 

**Material:**

- Body & Sun Shields: 1.2 to 2.0mm galvanised steel sheet
- Door: 1.2 to 2.0mm galvanised steel sheet
- Device Mounting Plate: 1.5mm galvanised steel sheet
- Seal: Polyurethane. UL listed.

**Body & Sun Shields:** The robust monoblock body with sloping roof is fabricated using 1.2 to 2.0 galvanised steel sheet. Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nuts are incorporated to accommodate mounting. The roof consists of a sloped roof design that protrudes past the seal. Sun shields are provided with spacers to offset the surface of the shield from the surface of the enclosure.

**Single Door:** The robust surface mounted door is fabricated using 1.2 to 2.0mm galvanised steel sheet and incorporates concealed removable hinges with captive pins. The door is designed for a 110° opening. Each door contains cable management rails, an M6 earth stud and a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Seal:** UL listed Polyurethane seal (FIP). Temperature resistance: -40°C to 80°C

**Lock:** Chrome 3mm double bit insert quarter turn lock with key.

**Device Mounting Plate:** 1.5mm galvanised steel sheet.

# Mounted Electrical Enclosures

**SSSR1**

Stainless Steel Grade 316/316L

**SLOPING ROOF | SINGLE DOOR | IP66**

The IP Enclosures SSSR range of grade 316/316L stainless steel sloping roof enclosures are designed to house a variety of electrical switch and control equipment in extreme environments. The sloping roof assists to prevent build up of dust, debris and waste material.

## Features & Specifications

**IP Enclosures SSSR range of grade 316/316L stainless steel sloping roof electrical enclosures are designed to house a variety of electrical switch and control equipment while preventing build up of dust, debris and waste material.**

**Protection:** Complies with IP66 IK10, NEMA 4x

**Standard:** IEC62208, IEC/EN/AS60529 

**Material:**

- Body: 1.5mm Grade 316/316L Stainless Steel
- Door: 1.5mm Grade 316/316L Stainless Steel
- Device Mounting Plate: 1.5mm Galvanised Steel Sheet
- Seal: Polyurethane. UL listed.

**Surface Finish:** 0.4 micron Ra surface brushed finish

**Body:** The robust monoblock body with sloping roof is fabricated using 1.5mm Grade 316/316L Stainless Steel. Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nutserts are incorporated to accommodate mounting and accessories. The roof consists of a sloped roof design that protrudes past the seal, flush with the front of the door face.

**Door:** The robust surface mounted door is fabricated using 1.5mm Grade 316/316L Stainless Steel and incorporates concealed removable hinges with captive pins. The door is designed for a 110° opening. Each door contains cable management rails, an M6 earth stud and a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Seal:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Lock:** 304ss 8mm square drive quarter turn lock with key. (316ss optional).

**Device Mounting Plate:** Fabricated using 1.5mm galvanised steel sheet.

Transparent Doors can be easily fitted to our range of electrical enclosures. Transparent Doors are provided as a standard accessory. Simply remove the standard door and replace with a transparent door.

# WINDOOR

IP Enclosures provide a range of transparent glazed doors that can be easily fitted to our range of electrical enclosures. Transparent doors are provided as a standard accessory. Simply remove the existing door and replace with a transparent door.

## Features and Specifications

**Protection:** Complies with IP66

**Standard:** IEC/EN/AS60529

### STEEL RANGE

#### Material:

- Enclosure Door: 1.5mm galvanised steel sheet
- Enclosure Seal: Polyurethane
- Windows: 4mm transparent tempered glass

**Door:** Fabricated from 1.5mm galvanised steel sheet incorporating concealed removable hinges with captive pins. Provided with recessed windows manufactured from 4mm transparent tempered glass with seal. Powder coated 80-120 micron.

**Seal:** Machine applied Polyurethane foamed in place (FIP).

**Lock:** Chrome 3mm double bit quarter turn lock.

### STAINLESS STEEL RANGE

#### Material:

- Enclosure Door: 1.5mm Grade 316/316L Stainless Steel
- Enclosure Seal: Polyurethane
- Windows: 4mm transparent tempered glass

**Door:** Fabricated from 1.5mm Grade 316/316L Stainless Steel incorporating concealed removable hinges with captive pins. Provided with recessed windows manufactured from 4mm transparent tempered glass with seal.

**Seal:** Machine applied Polyurethane foamed in place (FIP).

**Lock:** 304ss 8mm square drive quarter turn lock. (316ss lock optional)

## Inner Door Escutcheons | Wall Mounted

IP Enclosures inner door escutcheons are designed and manufactured to easily fit into any IP Enclosures wall mounted electrical enclosure without drilling. Inner doors are tool lockable.

Inner door escutcheons enable operators to access control equipment while maintaining separation of hazardous voltage equipment. Inner door kits can be fitted to all IP Enclosures wall mounted electrical enclosures without drilling.

## STEEL RANGE

**Material:** 1.2-1.5mm galvanised steel sheet

**Lock:** Chrome 3mm double bit insert quarter turn lock.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. Standard colour: RAL7035. Other colour options are available. Refer to table.

## STAINLESS STEEL RANGE

**Material:** 1.2-1.5mm Grade 316/316L Stainless Steel.

**Lock:** 8mm square drive quarter turn lock.

## Distribution Board Kits | Wall Mounted

IP Enclosures distribution board Kits are designed to be easily fitted without drilling. The separate internal chassis frame can be fitted with components and wired prior to assembly into the enclosure. The removable escutcheon plates provide protection to the full perimeter of the enclosure.

The IP Enclosures 12, 24 and 36 pole distribution board kits are designed to be easily fitted to IP Enclosures electrical enclosures without drilling. They can be fitted into steel and stainless steel enclosures.

Distribution board kits are suitable for steel and stainless steel enclosures. The separate internal chassis frame can be fitted with components and wired prior to assembly into the enclosure without drilling. Removable escutcheon plates provide protection to the perimeter of the enclosure.

**Chassis Material:** Galv Sheet Steel

**Escutcheon Plates:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. The standard electrical enclosure colour is RAL7035. A full range of other colour options are available upon request.

**Slotted Din Rail Material:** Electrogalvanised Steel 7.5x35 RoHS Compliant. High quality DIN Rail manufactured from electrogalvanised steel for increased corrosion resistance. Standard 35mm wide symmetrical TS35 DIN Rail compatible with EN50022 and DIN46277-3.

- Material: Steel
- Plating: ALKALI ZINC Cr+3 TOP COAT (10-12 Microns)
- Standards: DIN5022, DIN5033, EN60715. RoHS Compliant.
- Dimensions: 7.5 mm deep x 35 mm wide.
- Colour: Silver
- Type: TS35 Slotted

## Rain Hoods | Wall Mounted

IP Enclosures provide a range of standard rain hoods for steel and stainless steel electrical enclosures to prevent settling and building up of liquids, corrosive solids, minerals, dust, dirt and debris on top of the enclosure.

**IP Enclosures provide a range of standard rain hoods for steel and stainless steel electrical enclosures. All IP Enclosures wall mounted electrical enclosures are manufactured with nutserts to accommodate rain hoods without drilling.**

Rain hoods are used to prevent settling and building up of liquids, corrosive solids, minerals, dust, dirt and debris on top of an electrical enclosure. If corrosive liquids and solids settle and build up on top of an enclosure, the integrity of the coating and material may be compromised which may lead to corrosion and ingress of liquids and solids into the enclosure. Without maintenance, this may compromise internal electrical components and could increase risk of electric shock.

IP Enclosures rain hoods are easily fitted onto IP Enclosures electrical enclosures. All IP Enclosures electrical enclosures are manufactured with nutserts to accommodate optional rain hoods without drilling to ensure that the IP rating is maintained. Rain hoods are provided with fasteners.

### STEEL RANGE

**Material:** 1.5mm galvanised steel sheet

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. Standard colour: RAL7035.

### STAINLESS STEEL RANGE

**Material:** 1.2-1.5mm Grade 316/316L Stainless Steel.

## Shelf Kits

SHL

IP Enclosures provide a range of adjustable component shelf kits for wall mounted electrical enclosures.

## COMPONENT SHELF (Height Adjustable)

Shelf systems have many uses and can be used for component storage, separation and battery storage. Fixed shelves are pressed to provide strength and are provided with vertical rails and fasteners for ease of installation. Multiple shelves can be fitted into each cabinet and shelves can be fully adjusted to the correct positions.

**Material:** 1.2 to 1.5 mm galvanised steel sheet

| Part Number | Size           |

## Accessories

Earth Kits, 19" Rails, Plan Pockets, DIN Rail

IP Enclosures provide a wide range of accessories including wiring plan pockets. This includes self-adhesive polycarbonate, steel and stainless steel wiring plan pockets.

# Accessories

## Earthing Kits

Standard earthing kits are available. Earthing kits consist of:

- Earth wire with ring connection
- 2 x M6 Nuts (to suit electrical enclosure earth connection points)
- Earth sticker labels
- Instruction diagram

Part Number: IP-EK-01 KIT - Standard Earthing Kit

## 19" Data Rack Rail Kits

Easily convert a standard wall mounted electrical enclosure into an IP66 19" Data Rack using our 19" Data Rack Kits. Simply fit and tighten four nuts. These kits are designed to fit our 600mm wide IP66 wall mounted electrical enclosures.

Material: Grade 316 Stainless Steel

Part Numbers:

IP-SS19R600 - 19" 11RU to suit 600 H x 600 W Electrical Enclosure

IP-SS19R800 - 19" 16RU to suit 800 H x 600 W Electrical Enclosure

## Wiring Plan Pockets

IP Enclosures provide A4 wiring plan pockets in polycarbonate, steel and stainless steel. Wiring plan pockets are sized to shroud unfolded, laminated A4 sized drawings and documents.

Part Numbers:

IP-PCPPA4 – A4 wiring plan pocket, Polycarbonate

IP-PSPPA4 – A4 wiring plan pocket, Powdercoated Steel

IP-SSPPA4 – A4 wiring plan pocket, 316 Stainless Steel

## Door Struts

Gas Door Struts can be provided separately or fitted to custom enclosures. (For door stays, refer to locking solutions)

Part Number: IP-STRUT1

## Slotted Din Rail 7.5 x 35 x 2m RoHS Compliant

High quality DIN Rail manufactured from electrogalvanised steel for increased corrosion resistance. RoHS-compliant (Restriction of Hazardous Substances) silver-coloured plating. 35mm wide symmetrical TS35 DIN Rail compatible with EN50022 and DIN46277-3.

Material: Steel

Plating: ALKALI ZINC Cr+3 TOP COAT (10-12 Microns)

Standards: DIN5022, DIN5033, EN60715. RoHS Compliant.

Dimensions: 7.5 mm deep x 35 mm wide x 2000mm long

Colour: Silver

Type: TS35 Slotted

Part Number: IP-DINRAIL7.5X35

Protection in the toughest conditions™

Food Beverage & Pharmaceutical

# Hygienic Electrical Enclosures

Stainless Steel Grade 316/316L

**SSH**

**SLOPING ROOF | SINGLE DOOR | HYGIENIC | IP69/K**

The IP Enclosures SSH range of IP69 hygienic electrical enclosures are designed for applications within the food & beverage, pharmaceutical and other industries that require high cleanliness.

## Features & Specifications

# SSH

The SSH range of IP69 hygienic electrical enclosures are designed to prevent contamination and are suitable for the food & beverage, pharmaceutical and other industries that require high cleanliness. They are suitable for high pressure and high temperature cleaning.

**Protection:** Complies with IP66, IP69, IP69K

**Standard:** IEC62208, IEC/EN/AS60529, ISO20653, Hygiene Guidelines 

**Material:**

- Body: 1.5mm Grade 316/316L Stainless Steel
- Door: 1.5mm Grade 316/316L Stainless Steel
- Device Mounting Plate: 1.5mm Galvanised Steel Sheet
- Seal: Blue Silicone FDA 21 CFR 177.2600 compliant

**Surface Finish:** Electropolished

**Body:** The robust monoblock body with sloping roof is fabricated using 1.5mm Grade 316/316L Stainless Steel. The roof consists of a sloped roof design with overhang. Integral device plate mounts and M6 earth studs are provided. The body is designed to promote self draining for ease of hygienic cleaning.

**Door:** The reversible door is fabricated using 1.5mm Grade 316/316L Stainless Steel and is suitable for left or right hand opening. It incorporates sloped edges. The door is designed for a 110° opening. Reversible hinges are grade 316 Stainless Steel.

**Seal:** Removable blue silicone seal. FDA 21 CFR 177.2600 compliant for food production areas.

**Lock:** IP69K Grade 316 Stainless Steel Hygiene lock. Dirt resistant and easy to clean. Tested to GS-NV 6:2015/12 for hygiene requirements.

**Device Mounting Plate:** Fabricated using 1.5mm galvanised steel sheet, pressed to provide additional strength and supplied pre-fitted.

**Accessories:** 50mm long hygienic wall mount spacer brackets with blue silicone seals are provided as optional accessories. They are designed to provide a 50mm offset between the wall and the enclosure. A set of four can be ordered using part number: IP-HWMB-KIT.

# Floor Standing Electrical Cabinets

## Steel | Powder Coated

# MF1S

**SINGLE DOOR | IP55**

IP Enclosures MF1S range of powder coated galvanised steel floor standing electrical cabinets for low voltage switchgear and controlgear assemblies are suitable for general industrial applications. All IP Enclosures are built to precision to ensure high quality standards.

## Features & Specifications

**IP Enclosures MF1S range of powder coated galvanised steel floor standing electrical cabinets for low voltage switchgear and controlgear assemblies are suitable for general industrial applications.**

**Protection:** Complies with IP55  
(Independent accredited test laboratory)

**Standard:** IEC62208, AS/EN/IEC60529 **CE**  
(IEC/EN/AS61439 Compliant)

**Material:**

- Main Frame: 2.0mm Galvanised Steel W Profile System
- Side, Rear & Roof Panels: 1.2mm Powder Coated Galvanised Steel Sheet
- Front Door: 2.0mm Powder Coated Galvanised Steel Sheet
- Mounting Plates: 1.5mm - 2.0mm Galvanised Steel Sheet
- Seal: EPDM

**Main Frame:** The robust modular main structure is fabricated using 2.0mm galvanised steel sheet W Profile system with 20mm hole pattern.

**Door:** The robust door is fabricated using 2.0mm powder coated galvanised steel sheet and incorporates four concealed reversible hinges. The door is designed for a 135° opening. Each door contains earth studs and an A4 document pocket.

**Side, Rear and Roof Panels:** Removable panels are fabricated using 1.2mm powder coated galvanised steel sheet.

**Base:** Base is 100mm

**Door Seal:** High quality EPDM replaceable door seal.

**Lock:** 4 point locking system with key-lock swing handle.

**Device Mounting Plate:** The device mounting plate is fabricated using 1.5-2.0mm mm galvanised steel sheet, pressed to provide additional strength.

**Earthing:** All panels are earthed to provide earthing continuity.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness.

- Standard Colour: RAL7035
- Colour of Base: RAL9005  
(Other colours available upon request).

**Accessories and Baying Kits:** A full range of accessories are available including baying kits. Contact us for more information.

# Floor Standing Electrical Cabinets

## Stainless Steel Grade 316/316L

# MF1SS

**SINGLE DOOR | IP55**

IP Enclosures MF1SS range of grade 316 stainless steel floor standing electrical cabinets for low voltage switchgear and controlgear assemblies are suitable for general industrial applications. All IP Enclosures are built to precision to ensure high quality standards.

## Features & Specifications

# MF1SS

**IP Enclosures MF1SS range of grade 316 stainless steel floor standing electrical cabinets for low voltage switchgear and controlgear assemblies are suitable for general industrial applications.**

**Protection:** Complies with IP55  
(Independent accredited test laboratory)

**Standard:** IEC62208, AS/EN/IEC60529 **CE**  
(IEC61439 Compliant)

**Material:**

- Main Frame: 2.0mm Grade 316/316L Stainless Steel W Profile System
- Covers: 1.2mm Grade 316/316L Stainless Steel
- Front Door: 2.0mm Grade 316/316L Stainless Steel
- Mounting Plates: 1.5mm - 2.0mm Galvanised Steel Sheet
- Seal: EPDM

**Surface Finish:** 0.4 micron Ra surface brushed finish

**Main Frame:** The robust modular main structure is fabricated using 2.0mm grade 316 stainless steel W Profile system with 20mm hole pattern.

**Door:** The robust door is fabricated using 2.0mm grade 316 stainless steel and incorporates four concealed reversible hinges. The door is designed for a 135° opening. Each door contains earth studs and an A4 document pocket.

**Side, Rear and Roof Panels:** Removable panels are fabricated using 1.2mm grade 316 stainless steel.

**Base:** Base is 100mm

**Door Seal:** High quality EPDM replaceable door seal.

**Lock:** 4 point locking system with key-lock swing handle.

**Device Mounting Plate:** The device mounting plate is fabricated using 1.5-2.0mm mm galvanised steel sheet, pressed to provide additional strength.

**Earthing:** All panels are earthed to provide earthing continuity.

**Accessories and Baying Kits:** A full range of accessories are available including baying kits. Contact us for more information.

\*1200 Wide Cabinets = Double Door

## Inner Door Escutcheons | Floor Standing

Inner door escutcheons are designed to be easily fitted into new or existing IP Enclosures floor standing electrical cabinets.

Inner door escutcheons are an optional feature that can be easily fitted into IP Enclosures floor standing electrical cabinets. Inner door kits are provided with the inner door, two vertical rails and fasteners for easy assembly.

IP Enclosures provide a range of inner door escutcheons for floor standing electrical cabinets. Inner doors enable operators to access control equipment inside an electrical cabinet while maintaining separation of hazardous voltage equipment within the hazardous voltage area behind the inner door. Hinged escutcheon plates accommodate control components such as circuit breaker handles, pushbuttons, indicator lights and HMI's. Each inner door kit is provided with the inner door, two vertical rails and fasteners for easy assembly into the cabinet.

## STEEL RANGE

**Material:** 1.5mm galvanised steel sheet

**Lock:** Chrome 3mm double bit insert quarter turn locks

**Surface Treatment:** UL approved epoxy polyester powder-coated with a textured finish 80-120 micron average thickness. Standard colour: RAL7035.

## STAINLESS STEEL RANGE

**Material:** 1.5mm Grade 316/316L stainless steel

**Locks:** 304ss 8mm square drive quarter turn locks. (316ss optional).

# Accessories

## Shelf Kits | Floor Standing

SHL

IP Enclosures provide a range of fixed and sliding adjustable shelves for floor standing electrical cabinets.

IP Enclosures provide a range of fixed and sliding adjustable component shelf kits for floor standing electrical cabinets.

## FIXED COMPONENT SHELF (Height Adjustable)

Fixed shelf systems have many uses and can be used for component storage, separation and battery storage. Fixed shelves are pressed to provide strength. They are provided with fasteners and can be fitted without drilling. Multiple shelves can be fitted into each cabinet and shelves can be fully adjusted to the correct positions.

**Material:** 1.2 to 1.5 mm galvanised steel sheet

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. The standard colour is RAL7035. A full range of other colour options are available upon request.

| Part Number | Description              |
|-------------|--------------------------|
| SKU         | Width x Depth (mm)       |
| IP-SHL6040  | 600W x 400D Shelf System |
| IP-SHL6060  | 600W x 600D Shelf System |
| IP-SHL6080  | 600W x 800D Shelf System |
| IP-SHL8040  | 800W x 400D Shelf System |
| IP-SHL8060  | 800W x 600D Shelf System |
| IP-SHL8080  | 800W x 800D Shelf System |

## SLIDING SHELF / LAPTOP DRAWER

Sliding shelf (laptop drawer) kits are provided assembled complete with 4 screws for fast and easy installation into floor standing electrical cabinets without drilling.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. The standard colour is RAL7035. A full range of other colour options are available upon request.

| Part Number      | Description        |

| SKU              | Width (mm)         |
| IP-MFS600LECTERN | 600W Sliding Shelf |
| IP-MFS800LECTERN | 800W Sliding Shelf |

# Mounted IP66 19" Data Racks

**SDW**

Steel | Powder Coated

**SINGLE DOOR | IP66**

The IP Enclosures SDW range of wall mounted IP66 19" data racks are designed for heavy duty outdoor applications to house sensitive data network equipment in harsh environments. They are suitable for internal and external installations. All IP Enclosures are built to precision to ensure consistent high quality standards.

## Features & Specifications

IP Enclosures SDW range of IP66 19" data racks are designed for heavy duty outdoor applications to house sensitive data network equipment in harsh environments. They are suitable for internal and external installations. All IP Enclosures are built to precision to ensure consistent high quality standards.

**Protection:** Complies with IP66 IK10

**Standard:** AS/EN/IEC60529, EIA-310-D 

**Material:**

- Enclosure Body: 1.5mm galvanised steel sheet
- Enclosure Door: 1.5mm galvanised steel sheet
- 19" Data Rack Rails: 1.5mm galvanised steel sheet
- Enclosure Seal: Polyurethane. UL listed.

**Body:** The robust monoblock body is 1.5mm galvanised steel sheet. Flat face sealing surfaces increase seal life. Pre-fitted blind nutserts are incorporated to accommodate wall mounting brackets to eliminate drilling to retain IP rating. The profiled roof design protrudes past the seal, flush with the front of the door face. A galvanised steel gland plate is also incorporated into the bottom face.

**Door:** The surface mounted door is 1.5mm galvanised steel sheet. It incorporates concealed removable hinges with captive pins. Doors are also designed for a 110° opening. Each door incorporates a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Seal:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Lock:** Chrome 3mm double bit insert quarter turn lock with key. A full range of locking solutions are available upon request.

**Gland Plate:** Gland plates are incorporated into the bottom face of the enclosure for cable management. The size and quantity vary according to enclosure size.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish 80-120 micron average thickness.  
 - Standard Colour: RAL7035 (*Other colours available upon request*).

**Accessories:** A range of data rack accessories are available.

**SD**

**SINGLE DOOR | IP66**

The IP Enclosures SD range of floor standing IP66 19" data racks are designed for heavy duty outdoor applications to house sensitive data network equipment in harsh environments. They are suitable for internal and external installations. All IP Enclosures are built to precision to ensure consistent high quality standards.

## Features & Specifications

IP Enclosures SD range of IP66 19" data racks are designed for heavy duty outdoor applications to house sensitive data network equipment in harsh environments. They are suitable for internal and external installations. All IP Enclosures are built to precision to ensure consistent high quality standards.

**Protection:** Complies with IP66 IK10

**Standard:** AS/EN/IEC60529, EIA-310-D 

**Material:**

- Enclosure Body: 1.5mm galvanised steel sheet
- Enclosure Door: 1.5mm galvanised steel sheet
- 19" Data Rack Rails: 1.5mm galvanised steel sheet
- Enclosure Seal: Polyurethane

**Body:** The robust monoblock body is 1.5mm galvanised steel sheet. Precision automated manufacturing equipment ensures accuracy and consistent high quality. Flat face sealing surfaces increase seal life. A gland plate with seal is also incorporated into the bottom face.

**Door:** The surface mounted door is 1.5mm galvanised steel sheet. It incorporates concealed removable hinges with captive pins. Doors are also designed for a 110° opening. Each door contains a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Door Seal:** A high quality full perimeter seal provides excellent sealing over a long life. It is machine applied Polyurethane foamed in place (FIP).

**Lock:** 3 point locking system with key-lock swing handle. A full range of locking solutions are available upon request.

**Gland Plate:** Gland plates with seals are incorporated into the bottom face of the enclosure for cable management. The size and quantity vary according to enclosure size.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. Standard Colour: RAL7035.

# Floor Standing IP66 19" Data Racks

## Stainless Steel Grade 316/316L

**SSD**

**SINGLE DOOR | IP66**

The IP Enclosures SSD range of stainless steel floor standing IP66 19" data racks are designed for extreme duty to house sensitive data network equipment in harsh environments. They are suitable for internal and external installations. All IP Enclosures are built to precision to ensure consistent high quality standards.

## Features & Specifications

**IP Enclosures SSD range of IP66 19" stainless steel data racks are designed for extreme duty to house sensitive data network equipment in harsh environments. They are suitable for internal and external installations.**

**Protection:** Complies with IP66 IK10

**Standard:** AS/EN/IEC60529, EIA-310-D 

**Material:**

- Enclosure Body: 1.5mm Grade 316/316L Stainless Steel
- Enclosure Door: 1.5mm Grade 316/316L Stainless Steel
- 19" Data Rack Rails: 1.5mm Grade 316/316L Stainless Steel
- Enclosure Seal: Polyurethane

**Surface Finish:** 0.4 micron Ra surface brushed finish

**Body:** The robust monoblock body is fabricated using 1.5mm Grade 316/316L Stainless Steel. Cutting, pressing and full continuous seam welding using precision automated manufacturing equipment to ensure accuracy and consistent high quality. Flat face sealing surfaces are provided to increase seal life. A stainless steel gland plate with seal is also incorporated into the bottom face.

**Door:** The robust surface mounted door is fabricated using 1.5mm Grade 316/316L Stainless Steel and incorporates concealed removable hinges with captive pins. The door is designed for a 110° opening. Each door contains a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Door Seal:** A high quality machine-applied continuous foamed in place (FIP) Polyurethane seal provides excellent sealing over a long life.

**Lock:** 3 point locking system with key-lock swing handle. A full range of locking solutions are available upon request.

**Gland Plate:** Gland plates are incorporated into the bottom face of the enclosure for cable management. They are provided with gaskets and fasteners. The size and quantity vary according to enclosure size.

## 19" Data Rack Accessories

The IP Enclosures range of 19" rack-mounted DIN rail and distribution panels provide flexibility to fit DIN mounted electrical and control components into 19" racks.

## Features & Specifications

# SDDIN

**Standard:** Compatible with 19" racks EIA-310-D

**Slotted Din Rail Material:** Electrogalvanised Steel 7.5 x 35 RoHS Compliant. Standard 35mm wide symmetrical TS35 DIN Rail compatible with EN50022 and DIN46277-3.

### 1RU 19" DIN Terminal Rail

# Infrastructure Field Cabinets

FC

Steel | Powder Coated

SINGLE DOOR | IP66

Plinth-mounted field cabinets house sensitive data network and electrical equipment for heavy duty outdoor applications including road/traffic management and intelligent transport systems.

## Features & Specifications

**Plinth-mounted infrastructure field cabinets are designed to house sensitive data network and electrical equipment for a variety of heavy duty outdoor applications including road/traffic management and intelligent transport systems.**

**Protection:** Complies with IP66  
(Excluding cutouts for fans/filters. Vent hoods covering fan/filter cutouts IP55)

**Standard:** IEC62208, IEC/EN/AS60529, EIA-310-D

**Material:**

- Body and Plinth: 2.0mm galvanised steel sheet
- Doors: 2.0mm galvanised steel sheet
- 19" Data Rack Rails: 1.5mm galvanised steel sheet
- Gland Plate: 3.0mm aluminium
- Enclosure Seal: Polyurethane

**Body:** The robust monoblock body is fabricated using 2.0mm galvanised steel sheet. The body is fitted with rain hood/sunshield, plinth, vent hoods and 4 x lifting eye bolts. Flat face sealing surfaces are provided to increase seal life. A 3mm galvanised steel split gland plate is also incorporated into the bottom face. Four cutouts 125mm x 125mm are provided to house fans and filters and each are covered with removable vent hoods. Precision automated manufacturing equipment ensures accuracy and consistent high quality. (Fans and filters ordered separately).

**Doors:** The front and rear doors are fabricated using 2.0mm galvanised steel sheet and are designed to provide flush recessed mounting to prevent vandalism and unauthorised access. The doors incorporate concealed removable hinges with captive pins. They are designed for a 110° opening and are provided with heavy duty door stays.

**19" Data Rack Rails:** Front and rear 19" data rack rails are fabricated from 1.5mm galvanised steel sheet.

**Door Seals:** Polyurethane foamed in place (FIP) full perimeter door seals provide excellent sealing over a long life. Temperature resistance: -40°C to 80°C.

**Locks:** Each door includes a 3 point locking system with key-lock swing handle. A full range of locking solutions are available upon request.

**Gland Plate:** 3mm aluminium split gland plates are incorporated into the bottom of the enclosure for cable management.

**Surface Treatment:** UL approved epoxy polyester powder coated with a smooth finish. 80-120 micron average thickness.

**Colour:** T33 Smoke Blue. (Other colour options available upon request.)

# Infrastructure Field Cabinet - Accessories FC

IP Enclosures provide a range of standard accessories for infrastructure field cabinets including fixed shelves and sliding shelves.

## Features & Specifications

### Fixed Shelf Kits

Fixed shelf kits have many uses and can be used for component storage and battery storage. Shelves are ventilated. They are provided with fasteners and can be easily fitted without drilling.

**Material:** Galvanised steel sheet.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness.

**Colour:** RAL9016 (Traffic White)

**Part Number:** IP-FCSHL7562

### Sliding Shelf Kits (Laptop Drawers)

Sliding shelf kits (Laptop drawer kits) are provided assembled complete with 4 screws for fast and easy fitting without drilling.

**Material:** Galvanised steel sheet.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness.

**Colour:** RAL9016 (Traffic White)

**Part Number:** IP-FCDRAWER

### Wiring Plan Pockets

Wiring plan pockets and document storage pockets can be provided to fasten to the inside lower half of each access door to provide space for the storage of site documentation. Wiring plan pockets are sized to shroud unfolded, laminated A4 sized drawings and documents or folded A3.

**Material:** Galvanised steel sheet.

**Surface Treatment:** UL approved epoxy polyester powder coated with a smooth finish. 80-120 micron average thickness.

**Colour:** T33 Smoke Blue.

**Part Number:** IP-FCPPA3-T33

# Transparent Isolation Cabinets

Steel | Powder Coated

ISO

TRANSPARENT | MULTI-ACCESS | IP55 to IP66

IP Enclosures range of transparent isolation cabinets are suitable for industrial applications where isolation or containment of hazardous processes are required.

## Features & Specifications

IP Enclosures range of transparent isolation cabinets are suitable for industrial applications where isolation or containment of hazardous processes are required.

**Protection:** Complies with IP55 to IP66 IK10, NEMA 4

**Standard:** IEC62208, IEC/EN/AS60529

**Material:**

- Body: 1.2mm galvanised steel sheet
- Gland / Device Mounting Plate: 1.5mm galvanised steel sheet
- Door: 1.5mm galvanised steel sheet
- Device Mounting Plate: 1.5mm galvanised steel sheet
- Seal: Polyurethane
- Windows: 4mm transparent tempered glass

**Body:** The robust monoblock body is fabricated using 1.2mm galvanised steel sheet. Flat face sealing surfaces are provided to increase seal life. M6 earth studs are provided. The floor gland plate is removable to enable cutting and fitting of equipment.

**Base:** The base is fabricated using 1.2mm galvanised steel sheet. The base is provided with four adjustable rubber mounting feet.

**Front and Top Doors:** The robust surface mounted doors are fabricated using 1.5mm galvanised steel sheet and incorporate concealed removable hinges with captive pins. The doors are designed for a 110° opening. Each door contains M6 earth studs. The top door is provided with gas struts and handle on larger sizes for ease of operation.

**Seals:** High quality machine-applied full perimeter Polyurethane foamed in place (FIP) seals provide excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Locking Handles:** Quarter turn cast alloy L handles coated black are provided.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness.

# HMI Enclosures

## Steel | Powder Coated

HMI

FRONT PANEL | REAR DOOR | IP66

The HMI range is an aesthetic and ergonomic control panel system. The simplified flat front panel is designed to mount operator interfaces. Access is via a lockable rear door incorporating a device mounting plate. HMI Enclosures are designed for use with IP Enclosures Support Arm Systems.

## Features & Specifications

The IP Enclosures range of IP55 HMI Enclosures are an aesthetic and ergonomic control panel system. The simplified flat front panel is designed to mount operator interfaces. Access is via a lockable rear door. HMI Enclosures are designed for use with IP Enclosures Support Arm Systems.

**Protection:** Complies with IP66

**Standard:** AS/EN/IEC60529

**Material:**

- Enclosure Body: 2.0mm galvanised steel sheet
- Enclosure Door: Galvanised steel sheet
- Enclosure Front Panel: Galvanised steel sheet
- Enclosure Seal: Polyurethane

**Body:** The robust monoblock body is fabricated using 2.0mm galvanised steel sheet. Cutting, pressing and full continuous seam welding using precision automated manufacturing equipment ensures accuracy and consistent high quality. Flat face sealing surfaces are provided to increase seal life. M6 earth studs and equipment mounting studs are provided.

**Door:** The robust surface mounted door is fabricated using galvanised steel sheet and incorporates concealed removable hinges with captive pins. The door is designed for a 110° opening. The door contains an integral device mounting plate and a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Front Panel:** The front panel is fabricated using galvanised steel sheet. It is removable via internal fasteners to cut or machine holes to mount HMI's and operator devices. Sealing is achieved via a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Seals:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

**Lock:** Chrome 3mm double bit insert quarter turn lock with key.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. (RAL7035 Standard)

## Accessories

### Support Arm Systems

Support arm systems enable safe operator access to HMI's and enable strategic positioning of visual display outputs.

**IP Enclosures provide support arm systems for HMI enclosures designed for ease of assembly and operator accessibility. Support arms enable safe operator access to HMI's and enable strategic positioning of visual display outputs.**

**IP-045 – Light Duty Support Arm System**

Designed for light loads and short spans. It has a modular structure and modern design. Consists of a wide range of components for various configurations. It has a carrying capacity of 40kg for a 1m profile length.

**IP-045-Length (mm)**  
45mm x 72mm Support Profile

# Terminal Boxes

## Steel | Powder Coated

**TB**

**SCREWED LID | IMMERSIBLE | IP67**

The IP Enclosures TB range of powder coated galvanised steel terminal boxes are designed to withstand immersion.

## Features & Specifications

The IP Enclosures TB range of powder coated galvanised steel terminal boxes are designed to withstand immersion to 1.5m depth.

**Protection:** Complies with IP67 (Max. Depth 1.5m)

**Standard:** IEC/EN/AS60529 **CE**

**Material:**

- Housing: 1.5mm Galvanised Steel Sheet
- Lid/Door: 1.5mm Galvanised Steel Sheet
- Device Mounting Plate: 1.5mm Galvanised Steel Sheet
- Seal: EPDM

**Housing:** The robust housing is fabricated using galvanised steel sheet and incorporates a high quality EPDM seal. A device mounting plate is provided fitted. Integral mounting flanges with slotted mounting holes are incorporated for ease of installation.

**Lid/Door:** The robust screwed lid/door is fabricated using galvanised steel sheet and incorporates an earth stud.

**Seal:** High quality full perimeter EPDM seal. Temperature resistance -35°C to 130°C. (RoHS & REACH compliant)

**Device Mounting Plate:** Fabricated using 1.5mm galvanised steel sheet, pressed to provide additional strength and supplied pre-fitted. DIN Rail sized to suit can be supplied as an optional accessory.

**Surface Treatment:** UL approved epoxy polyester powder coated with a textured finish. 80-120 micron average thickness. Standard Colour RAL7035 (Other colours available upon request. Refer to table)

# Terminal Boxes

**SSTB**

Stainless Steel Grade 316/316L

SCREWED LID | IMMERSIBLE | IP67

The IP Enclosures SSTB range of grade 316/316L stainless steel terminal boxes are designed to withstand immersion.

## Features & Specifications

The IP Enclosures SSTB range of grade 316/316L stainless steel terminal boxes are designed to withstand immersion to 1.5m depth.

**Protection:** Complies with IP67 (Max. Depth 1.5m)

**Standard:** IEC/EN/AS60529 

**Material:**

- Housing: 1.5mm Grade 316/316L Stainless Steel
- Lid/Door: 1.5mm Grade 316/316L Stainless Steel
- Device Mounting Plate: 1.5mm Galvanised Steel Sheet
- Seal: EPDM

**Surface Finish:** 0.4 micron Ra surface brushed finish

**Housing:** The robust housing is fabricated using 1.5mm Grade 316/316L Stainless Steel and incorporates a high quality EPDM seal. A device mounting plate is provided fitted. Integral mounting flanges with slotted mounting holes are incorporated for ease of installation.

**Lid/Door:** The robust screwed lid/door is fabricated using 1.5mm Grade 316/316L Stainless Steel and incorporates an earth stud.

**Seal:** High quality full perimeter EPDM seal. Temperature resistance -35°C to 130°C. (RoHS & REACH compliant)

**Device Mounting Plate:** Fabricated using 1.5mm galvanised steel sheet, pressed to provide additional strength and supplied pre-fitted. DIN Rail sized to suit can be supplied as an optional accessory.

# Pushbutton Enclosures

SSPB

Stainless Steel Grade 316/316L

FLAT ROOF and SLOPING ROOF | IP66 | 22mm Hole

## Features & Specifications

IP Enclosures SSPB range of grade 316/316L stainless steel pushbutton enclosures are suitable for extreme duty heavy industrial applications. They are available in 1 hole, 2 hole, 3 hole, 4 hole and 6 hole configurations with a flat roof or a sloping roof.

**Protection:** Complies with IP66

**Standard:** IEC/EN/AS60529 

**Material:**

- Body: 1.5mm Grade 316/316L Stainless Steel
- Door: 1.5mm Grade 316/316L Stainless Steel
- Seal: Polyurethane. UL listed.

**Surface Finish:** 0.4 micron Ra surface brushed finish

**Body:** The robust monoblock body is fabricated using 1.5mm Grade 316/316L Stainless Steel. Flat face sealing surfaces are provided to increase seal life. Integral mounting flanges with slotted mounting holes are incorporated for ease of installation.

**Lid/Door:** The robust screwed lid/door is fabricated using 1.5mm Grade 316/316L Stainless Steel and incorporates a high quality machine-applied foamed in place (FIP) Polyurethane seal.

**Seal:** A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).

### FLAT ROOF

| Part Number | Description             |
|-------------|-------------------------|
| Standard    | Number of 22mm Holes    |
| IP-SSPB1    | 1 Hole                  |
| IP-SSPB2    | 2 Hole                  |
| IP-SSPB3    | 3 Hole                  |
| IP-SSPB4    | 4 Hole                  |
| IP-SSPB6    | 6 Hole (2 Columns of 3) |

### SLOPING ROOF

| Part Number | Description             |
|-------------|-------------------------|
| Standard    | Number of 22mm Holes    |
| IP-SSSRPB1  | 1 Hole                  |
| IP-SSSRPB2  | 2 Hole                  |
| IP-SSSRPB3  | 3 Hole                  |
| IP-SSSRPB4  | 4 Hole                  |
| IP-SSSRPB6  | 6 Hole (2 Columns of 3) |

# Thermal Control - Ventilation

IP-V

## Filter Vents & Fans

12VDC to 230VAC | 26m<sup>3</sup>/h to 700m<sup>3</sup>/h | IP54 (IP55 with Vent Hood)

IP Enclosures range of filter fans and vents feature a modern Italian grille design with minimal external projection. The front-opening grille allows filters to be easily maintained from the outside of the enclosure.

## Features & Specifications

IP Enclosures provide a wide range of ventilation products for electrical enclosures. The front-opening grille allows filters to be easily maintained from the outside of the enclosure. All molded parts are made of highly resistant and self-extinguishing ABS. IP Enclosures ventilation products are manufactured to the highest quality in Italy.

**Protection:** Complies with IP54 (or IP55 if used with Vent Hood)

**Conformity:** 

**Material:** ABS UL94V-0 color RAL7035

**Flow Direction:** Reversible

### FEATURES

**Modern Design:** A positive visual impact is provided by the modern grille design and minimal external projection. All molded parts are made of highly resistant and self-extinguishing ABS, UL94 VO grade. The standard color is RAL7035.

**Easy Maintenance:** Filter mats can be easily maintained from outside of the enclosure due to the front-opening grille. Replacement of soiled filter mats takes only a few seconds without the use of tools.

**Wide Range of Air Flow Ratings:** 26m<sup>3</sup>/h to 700m<sup>3</sup>/h

**Optimal Enclosure Protection:** The special configuration of the grille, foam seal gasket and filter mat ensures an IP54 protection of the enclosure.

**Quick Electrical Connection:** Fitted with spring terminals for faster and safer wiring. Default terminal position is above the fan but can be easily changed to bottom of fan to suit wiring needs without tools.

**Reversible Fan:** Default air flow direction is from outside to inside of the enclosure. If required, air flow can be reversed due to quick release fan lock system without the use of tools.

**Fast Installation:** Installation is fast due to the simple square cutout on the enclosure and the snap-in fixing system. No fasteners are required.

**Vent Hoods:** To obtain IP55 protection, use in conjunction with IP Enclosures vent hoods. Hinged vent hoods are available to provide operator access to easily maintain filters from the outside of the enclosure.

### Easy Maintenance due to Front Opening Grille

Step 1: Open Grille

Step 2: Remove Filter

Step 3: Insert Filter

Step 4: Close Grille

# Thermal Control - Ventilation

## Roof Vents & Roof Fans

IP-RV/RFV

230VAC | 600m<sup>3</sup>/h to 1000m<sup>3</sup>/h | IP44

IP Enclosures provide a wide range of roof mounted ventilation products for electrical cabinets.

## Features & Specifications

# IP-RV/RFV

IP Enclosures provide a wide range of ventilation products for electrical enclosures. All molded parts are made of highly resistant and self-extinguishing ABS. IP Enclosures ventilation products are manufactured to the highest quality in Italy.

**Protection:** Complies with IP44

**Conformity:** 

**Material:** ABS UL94V-0 color RAL7035

## Accessories

VH

### Louvre Vents, Vent Hoods & Sun Shields

IP Enclosures vent hoods assist to protect internal components by increasing the protection of fans and vents to IP55. Hinged vent hoods are also available to enable easy access to fans and filters for filter maintenance without the need to open the enclosure.

# Thermal Control - Heating

## Anti-Condensation Heaters

IP-H

Compact, Touch Shield & Fan-Assisted | 75W to 750W

Anti-condensation heaters are required to prevent failures or corrosion caused by low temperatures or high humidity. IP Enclosures heating products are manufactured to the highest quality in Italy.

# Anti-Condensation Heaters for Electrical Enclosures

# IP-H

IP Enclosures provide a range of heating products for electrical enclosures. Our range of heating products are manufactured to the highest quality in Italy.

## Compact | 75W to 150W

| FEATURES                  | UNIT    | IP-H75  | IP-H100     | IP-H150 |
|---------------------------|---------|---|-------------|---------|
| Heating Capacity*         | W       | 75  | 100         | 150     |
| Power supply              | V       | 120-240V AC or DC   |             |         |
| Inrush current            | A       | 4   | 5           | 9.5     |

# Thermal Control - Cooling

## Air Conditioners

IP-AC

350W to 2kW | Indoor & Outdoor

IP Enclosures air conditioners are made in Italy and are designed for the cooling needs of electrical cabinets. They are optimised for door or side-panel mounting and have been designed for high efficiency and low maintenance.

## LED Lighting Solutions

### 24-48VDC to 240VAC

IP Enclosures provide high quality LED lighting solutions that have been specifically designed for electrical enclosures.

Features:

- High efficiency LED lamps for enclosures.
- Designed to suit a wide voltage range from 24VDC to 240VAC in a single model.
- Spring terminal connections.
- Easy to install.
- Provided with integral on-off switch or motion sensor.
- Screw-type mounting for stainless steel or magnet mounting for steel enclosures.

## Locking & Security Solutions

Our electrical enclosures are supplied fitted with standard locks. However, to provide maximum flexibility, IP Enclosures also provide a full range of electrical enclosure locks, handles and security solutions.

**Quarter Turn**  
 IP-L001 - 3mm Double Bit Chrome  
 IP-L002 - 8mm Square Chrome  
 IP-L026 - 3mm Double Bit Stainless Steel  
 IP-L027 - 8mm Square Stainless Steel

**Compression**  
 IP-L058 - 316 Stainless Steel

**IP69K Hygiene**  
 IP-L030 - 316 Stainless Steel

**IP69K Hygiene Compression**  
 IP-059 - 316 Stainless Steel

**Keys**  
 IP-L004 - 3mm Double Bit Chrome  
 IP-L005 - 8mm Square Chrome

**Wing Knob**  
 IP-L060 - Cast Alloy Coated Black  
 IP-L029 - 316 Stainless Steel

**Wing Knob Keyed**  
 IP-L045 - Cast Alloy Coated Black  
 IP-L028 - 316 Stainless Steel

**Wing Knob Padlockable**  
 IP-L043 - Cast Alloy Coated Black  
 IP-L031 - 316 Stainless Steel

**T Handle**  
 IP-L044 - Cast Alloy Chrome  
 IP-L061 - Cast Alloy Coated Black  
 IP-L052 - 316 Stainless Steel

**T Handle Keyed**  
 IP-L048 - Cast Alloy Chrome  
 IP-L049 - Cast Alloy Coated Black  
 IP-L053 - 316 Stainless Steel

**L Handle**  
 IP-L054 - Cast Alloy Chrome  
 IP-L055 - Cast Alloy Coated Black  
 IP-L056 - 316 Stainless Steel

**L Handle Keyed**  
 IP-L057 - Cast Alloy Chrome  
 IP-L062 - Cast Alloy Coated Black  
 IP-L063 - 316 Stainless Steel

**Handle**  
 IP-L064 - Cast Alloy Coated Black

**Handle**  
 IP-L065 - Aluminium

**Door Stays**  
 IP-L067 - Zinc Plated Steel  
 IP-L068 - Stainless Steel

**Electro-Mechanical**  
 Access Control via RFID, keypad or remote control. Upon request.

**3 Point Wing Knob Keyed**  
IP-L069 - Cast Alloy Coated Black

**3 Point T Handle Keyed**  
IP-L070 - Cast Alloy Coated Black

**3 Point L Handle**  
IP-L071 - Cast Alloy Coated Black

**Linear Handle**  
IP-L072 - Cast Alloy Coated Black

**Swing Handle**  
IP-L006 - Polyamide Coated Black  
IP-L007 - Polyamide & Cast Alloy Coated Black

**Swing Handle Padlockable**  
IP-L009 - Polyamide & Cast Alloy Coated Black

**3 Point Swing Handle\***  
IP-L011 - Polyamide Coated Black  
IP-L012 - Polyamide & Cast Alloy Coated Black  
IP-L036 - with 3mm Double Bit Barrel

**3 Point Swing Handle Padlockable\***  
IP-L014 - Polyamide & Cast Alloy Coated Black

**Swing Handle**  
IP-L073 - Cast Alloy Coated Black

**Swing Handle Padlockable**  
IP-L074 - Cast Alloy Coated Black

**3 Point Swing Handle\***  
IP-L075 - Cast Alloy Coated Black

**3 Point Swing Handle Padlockable\***  
IP-L076 - Cast Alloy Coated Black

**Low Profile**  
IP-L018 - Cast Alloy Coated Black  
IP-L019 - Cast Alloy Chrome

**Low Profile Padlockable**  
IP-L041 - Cast Alloy Coated Black  
IP-L042 - Cast Alloy Chrome

**3 Point Low Profile\***  
IP-L022 - Cast Alloy Coated Black  
IP-L023 - Cast Alloy Chrome

**3 Point Low Profile Padlockable\***  
IP-L024 - Cast Alloy Coated Black  
IP-L025 - Cast Alloy Chrome

**Stainless Steel Swing Handle**  
IP-L033 - 316 Stainless Steel

**Stainless Steel Swing Handle Padlockable**  
IP-L037 - 316 Stainless Steel

**3 Point Stainless Steel Swing Handle\***  
IP-L035 - 316 Stainless Steel

**3 Point Stainless Steel Swing Handle Padlockable\***  
IP-L039 - 316 Stainless Steel

# Custom Electrical Enclosures

IP Enclosures provide custom electrical enclosures that are designed and manufactured to meet your unique needs.

**Electrical enclosures, cabinets and data racks are designed and manufactured to suit project specifications and unique needs. No matter how small, large or complex, we work with customers to meet project requirements.**

**Major Projects**

We work with a wide range customers world wide to provide custom electrical enclosures to meet project requirements. We can design and manufacture to meet existing specifications and drawings or can assist to develop these in conjunction with customers, consultants, end users and contractors.

**Modifications to Standard Product**

Do you buy electrical enclosures and then modify them by drilling, cutting holes or adding accessories? Save time, money and risk by ordering custom enclosures with holes pre-drilled and cut. We provide an economical alternative for customers who require modified 'custom' enclosures.

**Certified IP Rated Enclosures**

We are a specialist electrical enclosure brand that specialises in electrical enclosures. You can be confident that your custom enclosure conforms to IEC62208 and IEC/EN/AS60529. We provide custom enclosures up to IP66, Nema 4, Nema 4x including IP55, IP56, IP65 and IP66 rated enclosures.

**Examples**

- Non-standard shapes and sizes
- Holes and cut-outs
- Custom paint or powder-coat colour
- Anti-graffiti coating
- Locking systems
- Ventilation
- Internal shelves & brackets
- Viewing windows
- Accessories fitted
- ...etc

Simply contact our customer support team and tell us what you need. Our support team will work with you to determine the best and most economical solution. We provide 2D drawings and 3D Models for approval prior to manufacture.

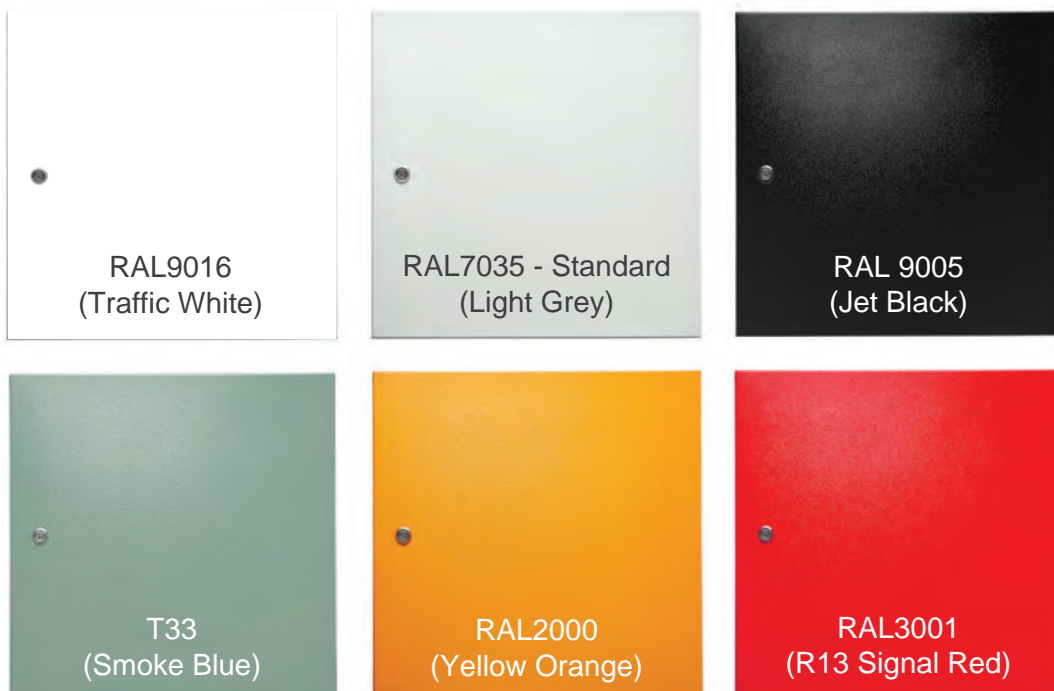

# Colour Options

## COLOUR CHART

Standard colours are shown in the colour chart below. All enclosures are supplied as RAL7035 Light Grey unless requested otherwise. Refer to tables for part number suffix. Other RAL colours available upon request.

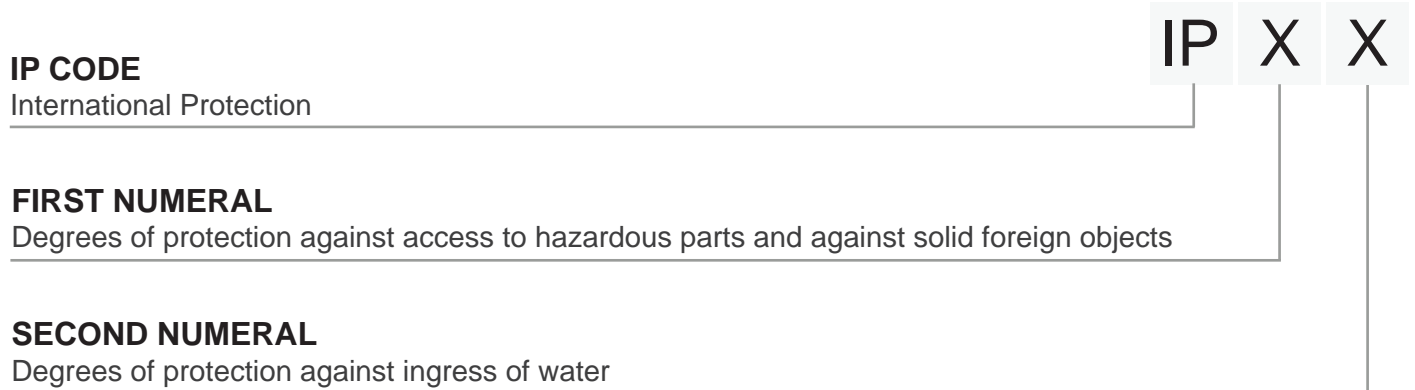

# Degrees Of Protection - IP Ratings

## Australian Standard IEC/EN/AS60529 - Degrees of protection by enclosures (IP Code)

IEC/EN/AS60529 provides definitions for degrees of protection provided by enclosures of electrical equipment, with regard to protection of persons against access to hazardous parts inside the enclosure and protection of the equipment inside the enclosure against ingress of solid foreign objects and harmful effects due to the ingress of water.

### FIRST NUMERAL – Protection against solids/dust

- IP0X - No protection
- IP1X - Protection against solid objects > 50 mm
- IP2X - Protection against solid objects > 12 mm
- IP3X - Protection against solid objects > 2.5 mm
- IP4X - Protection against solid objects > 1 mm
- IP5X - Protection against dust (limited ingress allowed, no harmful deposit)
- IP6X - Fully protected from dust (dust tight)

### SECOND NUMERAL – Protection against water

- IPX0 - No protection
- IPX1 - Protection from vertically dripping water
- IPX2 - Protection from sprays/dripping of water up to 15° from vertical
- IPX3 - Protection from spraying water up to 60° from vertical
- IPX4 - Protection from spraying water (all directions) – limited ingress acceptable if no hazard
- IPX5 - Protection from low pressure jets of water (all directions) – limited ingress acceptable if no hazard
- IPX6 - Protection against powerful jets of water, limited ingress acceptable if no hazard
- IPX7 - Protection from temporary immersion
- IPX8 - Protection from continuous immersion
- IPX9 - Protection from high pressure and temperature water jet (*IPX9 is covered by IEC60529 only, not covered by AS60529. Suitable for Pharmaceutical manufacturing, industrial food packaging.*)
- IPX9K - Protection from high pressure and temperature water jet (*IPX9K is covered by ISO20653 - Road Vehicles, Degrees of Protection; Not covered by IEC60529 or AS60529.*)
