HARBOUR EXPRESS

With multiple length options, Harbour Express is designed for versatility and can easily be upgraded to an emergency light with the addition of the plug-in dual test emergency pack.

Harbour Express accelerates every step of your installation with a design focused on speed, simplicity, and durability making it the ideal choice for demanding environments such as workshops, garages, car parks & wet areas.

The two-piece polycarbonate construction significantly reduces wiring time and hassle. The vandal-resistant housing and diffuser meet the stringent IK10 impact rating, backed by stainless steel clips and screws for added security and longevity.

A plug-and-play microwave sensor option and dimming capability further enhances energy efficiency and control with Harbour Express combining robust construction with user-friendly installation features, delivering high performance and reliability in a compact package.
