

# A Smarter Cable Gland for Industrial Applications

The SmartFit Cable Gland has been engineered specifically for single-person installation by eliminating the need for locknuts, rear access or a second installer.

Designed for modern control panels, junction boxes and industrial equipment, SmartFit glands transform cable management into a faster, cleaner and more reliable process.

## SmartFit Gland

### Why Choose Smartfit?

- Snap-in quick-fit design – no locknuts required
- IP68 rated to 5 bar for total environmental protection
- Fast, one-person installation ideal for confined spaces
- Wide enclosure compatibility (0.5–4.0mm wall thickness)
- VDE tested to EN 62444 for peace of mind
- Durable materials and seals for long service life

### A New Standard in Installation Efficiency

The SmartFit cable gland is compatible with wall thicknesses from 0.5mm to 4.0mm and its revolutionary snap-in mechanism enables installers to simply push the gland into place and insert the cable with no rear access required.

Designed to reduce labour time while maintaining IP68-rated protection, SmartFit glands deliver a faster, cleaner and more reliable approach to cable entry without compromising protection or compliance.

### Product Options and Configurations

SmartFit cable glands are available in both black and grey finishes, offering a professional appearance across a wide range of applications.

Designed for cable diameters from 6–12mm, these M20 glands suit a wide variety of industrial cable management needs.

### Available sizes and pack quantities include:

Grey	Black
CG/SF-20G 20mm (10 Pack)	CG/SF-20B 20mm (10 Pack)
CG/SF-25G 25mm (5 Pack)	CG/SF-25B 25mm (5 Pack)
CG/SF-32G 32mm (2 Pack)	CGSFA-2025 20-25mm Removal Tool
CG/SF-40G 40mm (Each)	CGSFA-3240 32-40mm Removal Tool
